

- 1 Test case for classroom
- 2 Implement classroom
- 3 Initiate messaging
- 4 Test case for send message
- 5 Test case for read message
- 6 Test case for delete message
- 7 Implement send message
- 8 Implement read message
- 9 Implement delete message
- 10 Merge messaging functions
- 11 Debug messaging
- 12 Initiate post manager
- 13 Test case for create post
- 14 Test case for download attachment
- 15 Test case for delete post

- 16 Test case for comment post
- 17 Implement create post
- 18 Implement download attachment
- 19 Implement delete post
- 20 Implement comment post
- 21 Merge post manager functions
- 22 Debug post manager
- 23 Merge messaging and post manager
- 24 Debug messaging and post manager
- 25 Initiate friend feature
- 26 Test case for add friend
- 27 Test case for remove friend
- 28 Implement add friend
- 29 Implement remove friend
- 30 Merge friend feature

- 31 Debug friend feature
- 32 Initiate classroom post filter
- 33 Test case for post require admin approval
- 34 Test case for admin can delete any post
- 35 Implement post require admin approval
- 36 Implement admin can delete any post
- 37 Merge classroom post filter
- 38 Debug classroom post filter
- 39 Merge friand and post filter features
- 40 Debug friend and post filter feature
- 41 Merge all feature till date
- 42 Debug merged features
- 43 Initiate message filter
- 44 Test case for message filter
- 45 Implement message filter

- 46 Integrate message filter
- 47 Debug integration
- 48 Initiate classroom feed
- 49 Test Case for classroom feed
- 50 Implement classroom feed
- 51 Integrate classroom feed
- 52 Debug classroom feed
- 53 Final integration and brainstorming
- 54 Initialize integration for MyRamdam module
- 55 Test case for MyRamdam module
- 56 Implement MyRamdam module integration
- 57 Debug integration of MyRamdam module
- 58 End project
